

Guest Seminar Announcement

Globalization, land use change, and avian biodiversity patterns in the Argentine Pampas region

Dr. Gregorio Gavier-Pizarro

Gregorio Gavier-Pizarro is a researcher at the Institute of Biological Resources of the National Institute of Agrarian Technology (INTA, Buenos Aires, Argentina). His research focuses on understanding drivers and patterns of changes in land use systems, in order to explore how land use and climate change affect biodiversity patterns and ecosystem services in agricultural environments.

Tuesday, September 20th 2011, 13:00 – 14:00
Room Uckermark 2'108
