Using satellites to save species: Remote Sensing for Conservation at WWF

Ms. Aurelie Shapiro

(WWF-Germany)

Aurélie Shapiro is a remote sensing specialist at the WWF – World Wide Fund for Nature, based in Berlin. Her research focuses on the use of satellite imagery for sustainable natural resource conservation, monitoring and assessment in both terrestrial and marine environments. The presentation will provide an overview of various projects applying satellite remote sensing, from tiger conservation to transboundary land use planning, mapping forest carbon and locating threats to ecosystems and habitats.

Tuesday, 24 January 2012, 17:00 (ct)

Room Uckermark 2'108
