# GEOGRAPHISCHES INSTITUT DER HUMBOLDT-UNIVERSITÄT ZU BERLIN

## Research in the United States

NEURUS – Network for European and U.S. Regional and Urban Studies

### What is NEURUS?

NEURUS is a student exchange program allowing graduate and advanced undergradate students to conduct research related to regional science abroad.

The program was desigend in 1998 by regional science related departments of six universities from the United States and the European Union.

The program offers students the opportunity to actively research issues on urban and regional development by spending a semester in the US and work closely together with faculty members of host universities. The results of this research should be used to write a master's or bachelor's thesis.

NEURUS in California, April 2015

# Who can apply?

All students at the Department of Geography, who are in the final stage of their studies and interested in realizing their bachelor's or master's research in the US, are welcome to apply for the program. The program has no destinct thematic focus, and thus, is open to various planning related topics.

## How does the program work?

The program aims on sending students from the three EU partner universities for research purposes to one of the four US partner universities and vice versa.

#### Schedule of the program:

Mid-March: Call for applicationEnd of Mai: Application deadlineMid-June: Selection of participants

Early September: US students start at EU host universities
